EDUCATION

Thapar Institute of Engineering and Technology

Bachelor of Technology - Electronics and Computers

Courses: Machine Learning, Data Structures & Algorithms, AI, Computer Networking, DBMS, OOPS, OS

D.A.V Public School | 12th Standard

Punjab, India

July 2022 – June 2026

Dehradun, India – Mar 2021

WORK EXPERIENCE

SWIGGY

Software Engineering Intern - Instamart B2C

Bangalore, India

Jan 2026 – Present

- Contributing to the **backend development** of the Instamart B2C platform, focusing on scalable microservices and API optimization.
- Collaborating with the engineering team to enhance system reliability and performance for high-concurrency traffic.
- Developing server-side logic to improve the end-to-user shopping experience and logistics efficiency.
- Participating in code reviews and architectural discussions within the B2C ecosystem.

METHER ITES DMCC

Business Analyst Intern

Dubai, UAE (Remote)

June 2025 – July 2025

- Analyzed enrollment and completion data to inform business decisions for new course launches.
- Conducted market research on competitive platforms and recommended strategic improvements.
- Collaborated with curriculum teams to update course content based on user feedback and analytics.

SKILLS

- Languages:** C, C++, Python, R, SQL, Go, HTML, CSS, Javascript.
- Frameworks:** Pandas, Numpy, Tidyverse, Matplotlib, Scikit-learn, Seaborn.
- Tools:** Git, Github, VS-code, Rstudio, Bigquery, Tableau, Matlab.
- Data Analysis:** Data Cleaning, Tableau, Advance SQL, Excel, Data Modeling, Business Analytics.
- Methodologies:** Agile, Scrum, SDLC, Iterative Development.
- Soft Skills:** Analytical Thinking, Problem-Solving, Data-Driven Decision Making, Communication, Teamwork.

PROJECTS

XAI for Climate Hazard Assessment: Enhanced Flood Prediction

Jun 2025 – Dec 2025

- Developed a hybrid **CNN-LSTM architecture** to model spatial features and temporal rainfall sequences, improving flood risk prediction accuracy for Indian river basins.
- Implemented **Explainable AI (XAI)** using SHAP to interpret model predictions, identifying key flood drivers.
- Engineered a pipeline for 35+ features utilizing the INDOFLOODS dataset and real-time weather APIs.
- Built a web-based decision support system providing real-time flood risk visualizations for disaster management.

Tech Stack: Python, TensorFlow, CNN-LSTM, SHAP, Flask, Scikit-learn, Weather APIs.

Customer Sales Dashboard: Olist E-commerce Analysis

Sep 2024 – Nov 2024

🔗 View Project

- Engineered an end-to-end data pipeline for **cleansing and preprocessing** in R (Tidyverse).
- Developed a dynamic **BI dashboard** in Tableau to visualize **KPIs** for sales trends and segmentation.
- Automated data ingestion workflows, enabling weekly sales trend analysis across 30+ product categories.

Tech Stack: R (Tidyverse, dplyr, ggplot2), Tableau Public.

Delhi Transit Analysis Dashboard

May 2024 – Jul 2024

🔗 View Project

- Architected a data pipeline using Python to model large-scale **geospatial GTFS data** in SQLite.
- Designed data stories in Tableau, quantifying a 15% operational **inefficiency** in peak-hour routes.
- Mapped 20+ transit routes to identify high-demand hubs, facilitating data-driven route optimization.

Tech Stack: Python, SQLite, MS-Excel, Tableau Public.

Visual Tree Traversal: Interactive Web Application

Feb 2025 – May 2025

🔗 View Project

- Implemented trees algorithms in JS, using **DOM manipulation** for smooth real-time animations.
- Designed a UI/UX with dynamic logs and speed controls to enhance algorithmic learning for students.
- Incorporated interactive DFS/BFS toggles and responsive layouts, improving accessibility for mobile users.

Tech Stack: HTML, CSS, JavaScript, Data Structures & Algorithms.

CERTIFICATION

- Google Data Analytics Certification** | View Credential

ACHIEVEMENTS

- Coding Platforms:** Solved **600+** problems on LeetCode and GeeksforGeeks.
- Hackathons:** Participated in 15+ events, building solutions under 24-hour deadlines.
- Webinar Series:** Certified series on FinTech Innovations and Financial Modeling.

VOLUNTEER EXPERIENCE

Core Member — Discipline — Urja Sport Fest

Apr 2024

- Managed logistical arrangements and protocols for 500+ participants, ensuring smooth event flow.
- Coordinated with creative teams to execute pre-event promotional strategies and decor.
- Liaised between faculty and volunteers to maintain festival discipline and resolve on-ground issues.
